# iFLT Language Camp

## Fluency Matters!

One-of-a-kind language  
classes guaranteed to  
build communication  
skills!

## What makes these classes different?

Traditionally, language classes in the United States have been highly ineffective, due to a number of factors:

- Focus on grammar
- Learners inundated with too many vocabulary words
- Emphasis on manipulating language for correctness
- Forcing learners to consciously memorize lists of topically categorized vocabulary words
- Boring lessons laden with drills and exercises that do **not** engage learners or result in fluency

Research shows that learners taught with CI-based strategies achieve much higher levels of proficiency. Why:

- Focus on **COMMUNICATION**
- Learners presented with manageable amount of vocabulary
- Emphasis on manipulating language for understanding & communication
- Inspiring learners to unconsciously acquire high-frequency words & phrases that are used in everyday communication
- Highly engaging, fun and personally relevant lessons that naturally and efficiently result in **FLUENCY**

## Languages Offered
